Configuration for [aviexe998.pythonanywhere.com](#)

Rename web app aviexe998.pythonanywhere.com

Rename your web app

You can rename your website to a [custom domain](#), `aviexe998.pythonanywhere.com`, or to a [custom PythonAnywhere subdomain](#).

[Cancel](#)[Rename web app](#)

Reload:

[Reload aviexe998.pythonanywhere.com](#)

Best before date:

We're happy to host your free website – and keep it free – but you'll need to log in at least once every one month and click the "Run until 1 month from today" button below. We'll send you an email a week before the site is disabled so that you don't forget to do that.

This site will be disabled on **Wednesday 01 April 2026**

Run until 1 month from today

[Paying users](#)' sites stay up forever without any need to log in to keep them running.

Traffic:

How busy is your site?

This month (previous month) 1 (0)

Today (yesterday) 1 (0)

Hour (previous hour) 1 (0)

Want some more data? [Paying accounts](#) get pretty charts ;-)

Code:

What your site is running.

Source code:

</home/aviexe998/mysite>

[Go to directory](#)

Working directory:

</home/aviexe998/>

[Go to directory](#)

WSGI configuration file:

</var/www/aviexe998.pythonanywhere.com/wsgi.py>

Python version:

3.10

Virtualenv:

Use a virtualenv to get different versions of flask, django etc from our default system ones. [More info here](#). You need to **Reload your web app** to activate it; NB - will do nothing if the virtualenv does not exist.

[Enter path to a virtualenv, if desired](#)

Log files:

The first place to look if something goes wrong.

Access log:

[aviexe998.pythonanywhere.com.access.log](#)

Error log:

[aviexe998.pythonanywhere.com.error.log](#)

Server log:

[aviexe998.pythonanywhere.com.server.log](#)

Log files are periodically rotated. You can find old logs here: </var/log>

Static files:

Files that aren't dynamically generated by your code, like CSS, JavaScript or uploaded files, can be served much faster straight off the disk if you specify them here. You need to **Reload your web app** to activate any changes you make to the mappings below.

URL Directory Delete

[Enter URL](#) [Enter path](#)

Security:

An HTTPS certificate is needed so that people can access your site securely. We automatically provide a certificate for `aviexe998.pythonanywhere.com`.

HTTPS certificate:

Automatically provided for this hostname

You need to **Reload your web app** to activate any changes made below.

Forcing HTTPS means that anyone who goes to your site using the insecure `http` URL will immediately be redirected to the secure `https` one. [More information here](#).

Force HTTPS:

Enabled Disabled ☐

Password protection is ideal for sites that are under development when you don't want anyone to see them yet. Note that password length is effectively limited to 8 characters.

Password protection:

Enabled Disabled ☐

Username:

[Enter a username](#)

Password:

[Enter a password](#)

Disable:

You can temporarily turn off your web site by disabling it. You can always re-enable it later.

[Disable webapp](#)

Delete:

Deleting this web app will remove your web app from the Internet, but will not remove your code. The WSGI configuration file will be backed up.

[Delete aviexe998.pythonanywhere.com](#)

x

Upgrade to add a new web app

On the Beginner plan, you can only have one web app at `aviexe998.pythonanywhere.com`.
